CAREER SUMMARY

Result-driven Full-stack developer with a strong background in building web applications, administrative dashboards, CRM systems, and e-learning platforms. Proficient in modern web technologies and frameworks, with expertise in scalable architecture, product development, and robust error handling. Skilled in collaborating with cross-functional teams to create secure, efficient, and user-friendly solutions. Passionate about driving innovation and optimizing business processes through technology. Dedicated to delivering high-quality, maintainable, and impactful digital solutions.

PROFESSIONAL EXPERIENCE

Organization : Al Rawabi Projects

Position : Web Developer

Period : October 2024 - October 2025

Duties and Responsibilities:

- Developed and maintained dynamic and responsive websites using HTML, CSS, JavaScript, PHP, and Laravel.
- Built custom features, dashboards, and APIs to support business operations and improve workflow efficiency.
- Integrated third-party services such as payment gateways, email services, and SMS APIs.
- Optimized website performance, loading speed, and SEO structure for improved user experience.
- Created, updated, and customized WordPress themes and plugins based on client requirements.
- Managed hosting, domain configuration, cPanel setups, and server-side deployments.
- Collaborated with designers and stakeholders to translate requirements into functional web applications.
- Fixed bugs, resolved backend issues, and ensured smooth functioning of all web applications.
- Maintained version control using Git/GitHub and followed best coding practices.
- Implemented security measures, data validation, and backup procedures to protect web assets.

Organization : GREENWORLD International Business Enterprise Private Limited

Position : Full Stack Developer

Period : March 2022 - October 2024

Duties and Responsibilities:

- Designed and developed scalable web applications using Laravel, ensuring optimized performance and security.
- Designed, developed, and maintained web applications, CRM system, HRM system, dashboards, and learning management systems to enhance business operations.
- Built and maintained APIs for seamless integration between web and mobile applications.
- Developed and deployed cross-platform mobile applications using Flutter, enhancing user engagement and accessibility.
- Developed responsive and interactive UI using Bootstrap, CSS, JavaScript, and integrated dynamic content from Laravel.
- Implemented real-time data tracking and analytics to monitor user engagement and improve course recommendations in Ed-Tech applications.
- Stay updated with industry trends to integrate the latest technologies, improving the efficiency and digital presence of the company.
- Troubleshoot and resolve technical issues to ensure smooth operation of business and education-related applications.
- Develop interactive dashboards and analytics tools for business insights, lead tracking, and student application monitoring.
- Ensure mobile responsiveness and cross-browser compatibility by following best practices in frontend development.

Organization : XpertConsortium

Position : Full Stack developer

Period : November 2021 - February 2022

Duties and Responsibilities:

- Work on full-stack development by building and maintaining web applications using HTML, CSS,
- JavaScript, PHP, React.js, Laravel
- Integrate and optimize APIs for seamless data exchange.
- Develop, test, and debug code to enhance software functionality, ensuring optimal performance and error-free execution.
- Maintain proper documentation of code, technical processes, and project updates to support team collaboration and future scalability.
- Work with databases like MySQL for efficient data management.

PROJECTS

- **Admission Tracker Web and Mobile App : <https://admissiontracker.in/>**

Developed mobile application and web application for student tracking, facilitating seamless monitoring of student activities and progress

- **Target Learning Web App : <https://elearn.targetlearningapp.com/login.php>**

Managed API integration, web app design, and payment gateway setup for a large project. Implemented subscription plans, organized lesson chapters, integrated the Vimeo player using JavaScript. Utilized Postman testing debugging.

- **Wise Learning Web App**

Responsible for designing the web application and integrating API using Postman. The project involved implementing subscription plans and organizing lesson chapters as well as creating a login panel for users to access the application

- **Wise ManagerDashboard**

Created and managed a dashboard using PHP and MySQL templates to serve a diverse user base, including owners, branch managers, and sales executives. Implemented varying levels of access and task assignment for different user types. Utilized CSV and JS PDF file creation, along with DataTables for table management.

- **Lifescool Website : <https://www.lifescool.app/>**

Developed Lifescool website to create an engaging, interactive platform that connects users to innovative educational resources. The website features a modern, user-friendly design optimized for seamless navigation, ensuring a smooth experience for students and educators alike. It incorporates responsive design and dynamic content to deliver a tailored experience, reflecting the brand's mission to make learning accessible and enjoyable."

- **Wytfox Website : <https://wytfox.in/>**

For Wytfox, I created a visually appealing and highly functional website that showcases the company's offerings in a sleek, professional manner. The design prioritizes ease of use and efficient navigation, with a focus on providing a smooth user experience.

SKILLS

- Frontend Development: Bootstrap, HTMS, JavaScript, React.js, CSS
- Backend Development : PHP. Laravel, Authentication and Authorization
- Database Management : MySQL, Database Optimization
- Content Management System : WordPress Developer and Customization
- Mobile and Cross Platform Development : Flutter, hybrid App Development
- Error handling and Debugging
- Performance Optimization
- Effectively working with cross-functional teams
- Optimizing UI/UX for better user experience
